Human Resources Control and Monitoring

### HARVEST

by

ZYMO TECH

Manage your company's assets through a platform accessible from anywhere in the world

Our Clients
Success Stories

Citromax

Citromax Group is a global leader in the supply of essential oils, juices, lemon pulp, and natural flavors.

AccessMan Harvest supported their operational modernization process by optimizing harvest management: it enabled the digitization of production records for field personnel and simplified contractor payments, all from our user-friendly mobile application. This resulted in greater agility, control, and real-time traceability.
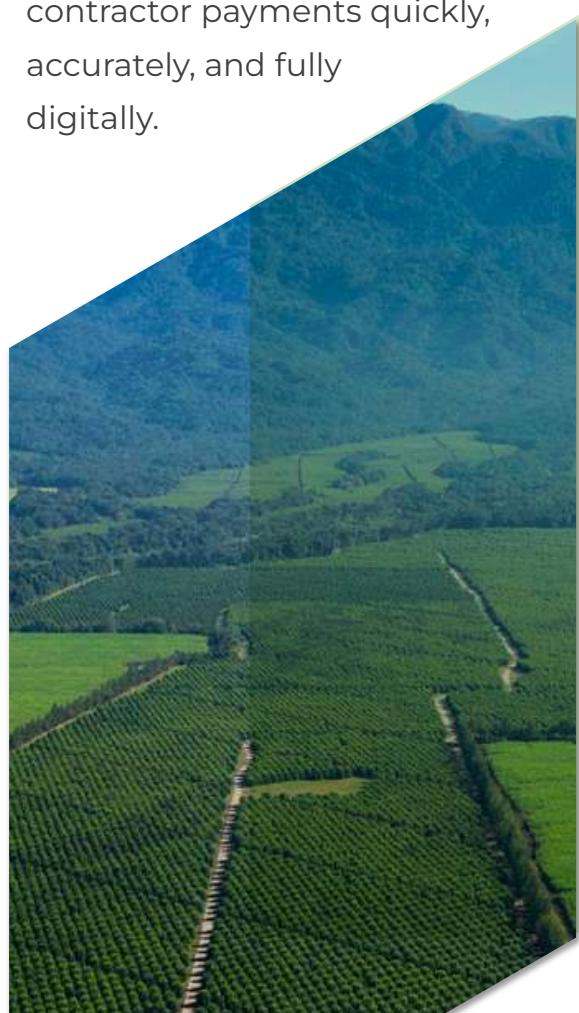

Citrusvil

A leading company in the global market, specializing in the production, processing, and global leader on lemon derivates production.

To optimize their field operations, they implemented **AccessMan Harvest**, a solution that allows them to record attendance, manage production, and process contractor payments quickly, accurately, and fully digitally.

Randstad

A global talent leader enabling agile, data-driven workforces at enterprise scale, focused on harvesting operations.

With AccessMan Harvest, they optimized the management of large agribusiness clients, such as world-renowned wineries and global suppliers of fresh fruit, by digitizing attendance and production records, streamlining payroll processing and operational control in the field, for simpler billing of outsourced services.
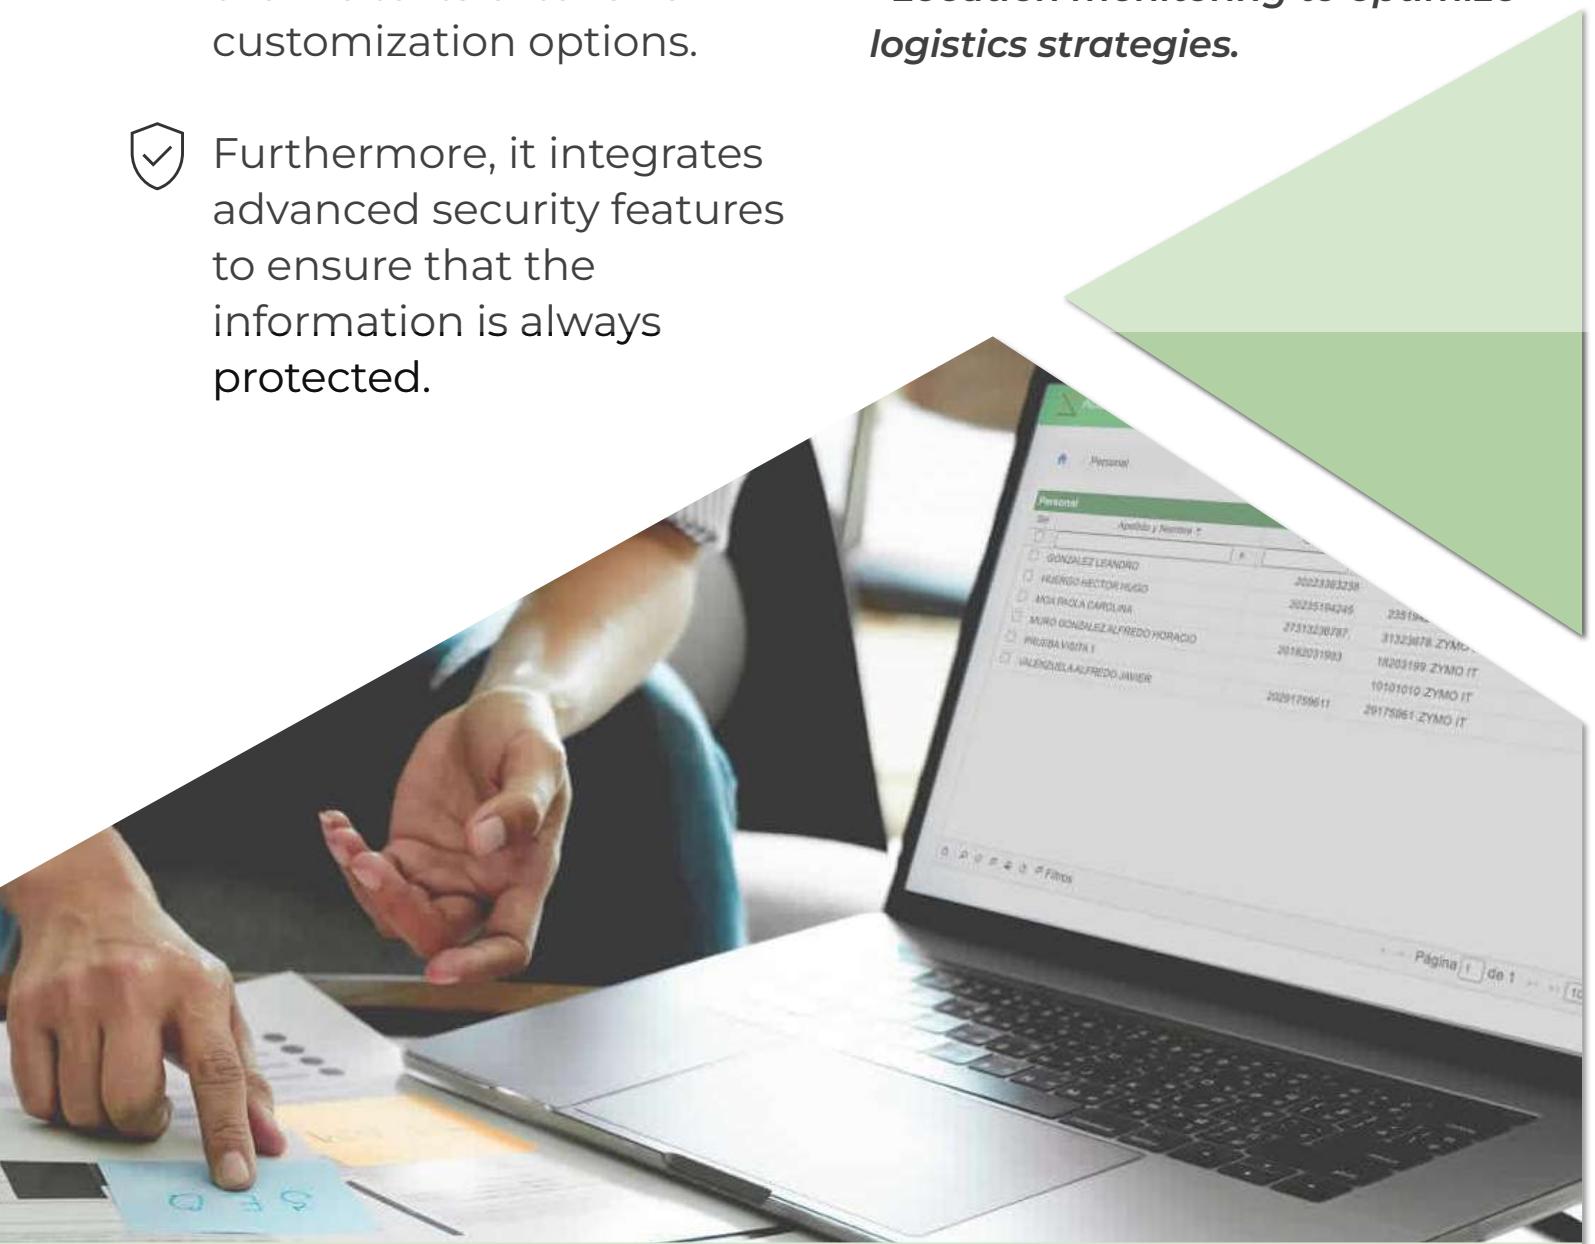

Our
Platform

AccessMan is a cloud-based platform, accessible from any location and device, that provides real-time information for agile and efficient management.

Each implementation is tailored to the client's specific needs and business model of each client, thanks to its extensive customization options.

Furthermore, it integrates advanced security features to ensure that the information is always protected.

Total Integration

- *Various HR systems, ERP, CRM and more.*
- *Compatibility with multiple brands of access control equipment.*
- *Native platform for IoT and IoP.*
- *Portable auditing tools for field audits.*
- *Real-time monitoring of attendance and distribution.*
- *Comprehensive management of employee productivity and performance.*
- *Location monitoring to optimize logistics strategies.*

Features

- UNIFIED MANAGEMENT
Centralizes the administration of digital personnel and contractor files, including all their documentation and updates.
Optimizes workflow by distributing data acquisition and input tasks among internal and external human resources.

- PORTABLE AUDIT
Implements complete control by capturing information directly at the operational endpoint. Drives continuous improvement with accurate and organized online data.

- BIOMETRIC OPERATION
Compatible with biometric equipment from multiple brands and with custom-developed collectors, adapted to the required security levels.

- SERVICE PORTAL
Unified online platform for all stakeholders involved in asset management. Facilitates the distribution of data upload and control tasks among internal and external partners, assigning permissions according to profiles and needs to achieve 100% efficient management.

Features

- **MULTIPLE COMPANIES**
  Manage, from a single platform, comprehensive control of personnel across different companies, optimizing management and unifying information.

- **OPEN SOURCE**
  Offers custom development, training for self-development of solutions, and an open API for seamless integration with existing systems.
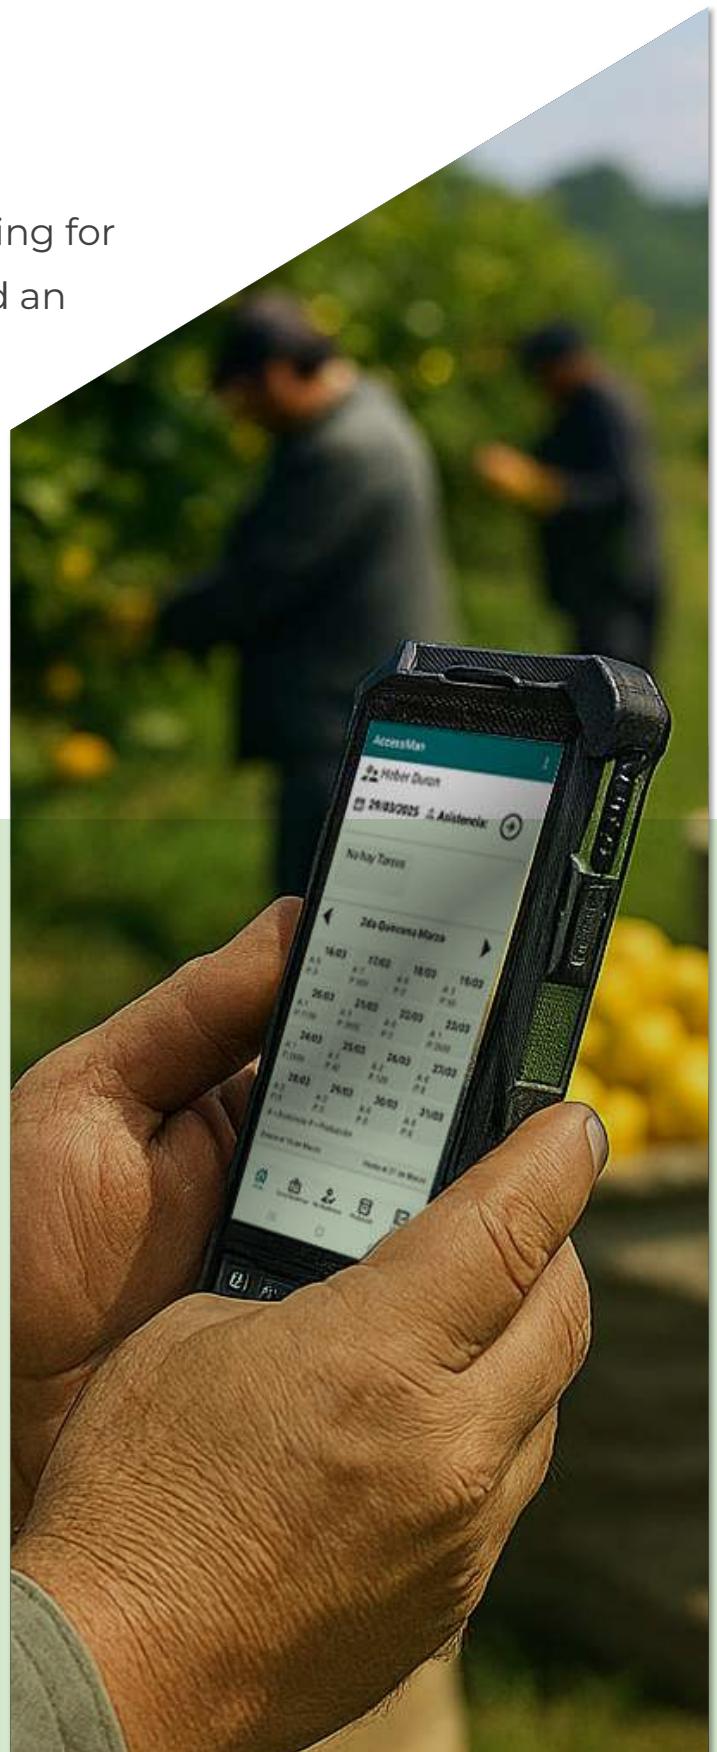

> **We develop and integrate sustainable technology solutions.**

> **We are dedicated to adding value for our clients by combining our technologies with unparalleled support.**
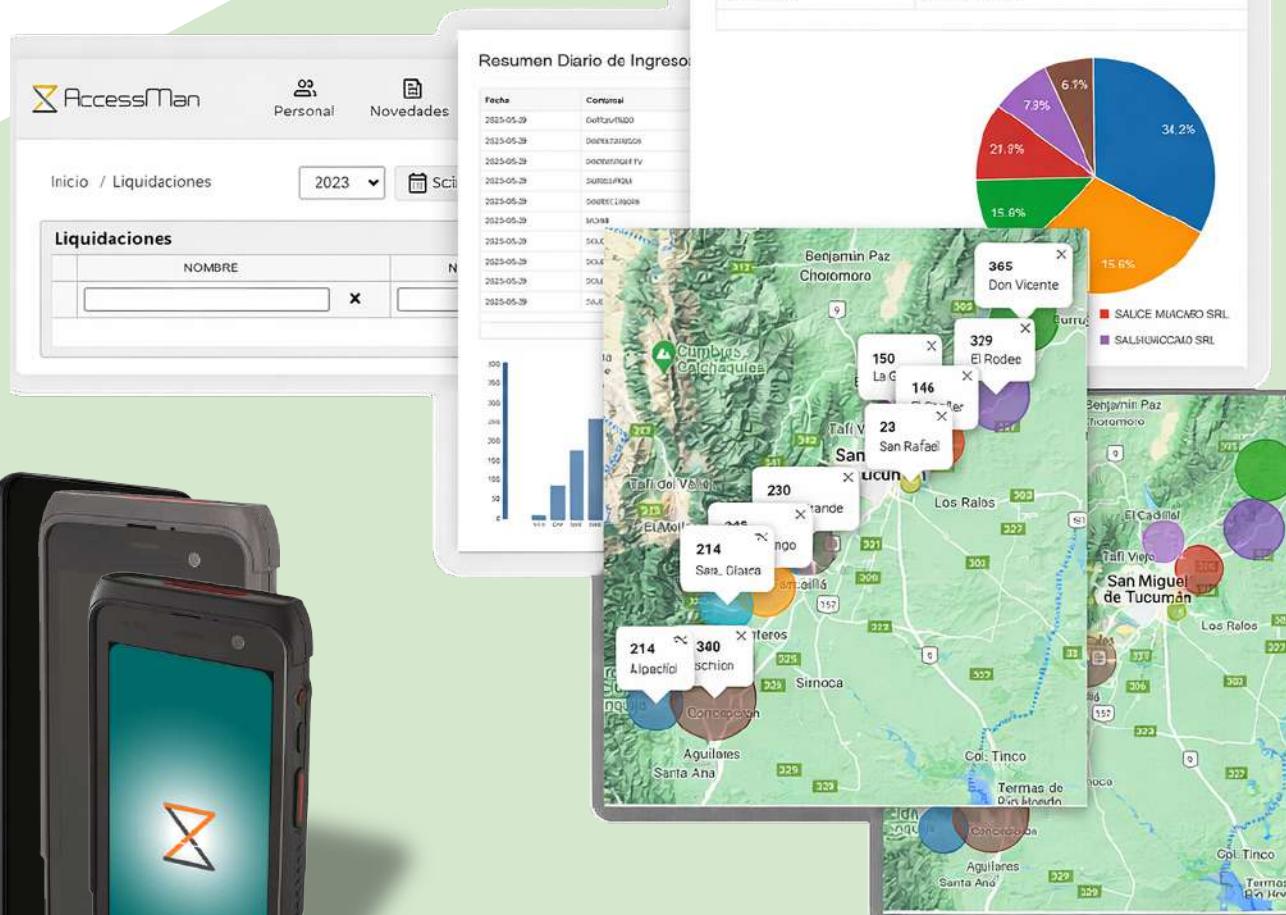

> *Optimizing personnel management in precision agriculture*
